

Name _____ # _____

Date _____ Pd. _____

Coordinate Grid Name Activity

For this activity, you will be plotting points on a 4-quadrant coordinate grid to spell your name. You may use block lettering, printing, or cursive. However, your letters must be composed of whole number points that can be written as ordered pairs. Be sure that your points for the letters can be easily identified on your coordinate grid. On the back of the coordinate grid paper or on a binder paper, list all the ordered pairs for each letter on your coordinate grid.
